Bricor is Australia's leading supplier of Data Strips, Display Hooks and Shelf Management, with an ever-increasing range to make sure that you get exactly what you need, every time. Our focus is to provide your point-of-sale area with a clean and professional look that will appear brand new every time.

We work with you to determine how best to meet your very specific needs. Our wide range of data strips, display hooks, shelf merchandising and accessories can be applied to any situation easily.

At Bricor, we are aware that value for money is important, and we strive to provide our clients with the best prices for high quality point-of-sale and shelf merchandising products.

Although Bricor is based in Sydney, our distribution network extends nationally. Browse through our online store at www.bricor.com.au and visit our contact page if you want to talk to a professional about your options, or if you require a quote.

■ Bricor Data Strip

Double-Sided Adhesives

Bricor only uses the best quality German double-sided adhesive tapes for all of its data strips. These tapes have shown to have the BEST Peel Strength and the BEST Shear Strength of any product on the market. The Adhesive Tape has a broad temperature range - ideal for the Supermarket or Retail environment.

Research has shown that a German foam double-sided adhesive tape has proven to be a better long term solution for Refrigeration Applications.

Preparation of the Surface

Bricor recommends the use of a clean rag and methylated spirits as the best cleaning agent for the preparation of the surface - even new shelving needs a clean with methylated spirits. DO NOT use Oil-based cleaning agents, like eucalyptus oil or kerosene. Oils and adhesives do not mix.

Applying the Data Strip

Once the surface has been prepared correctly the data strip can be applied by peeling the adhesive liner at the back of the data strip and pressing firmly across the top section of the strip with a clean rag.

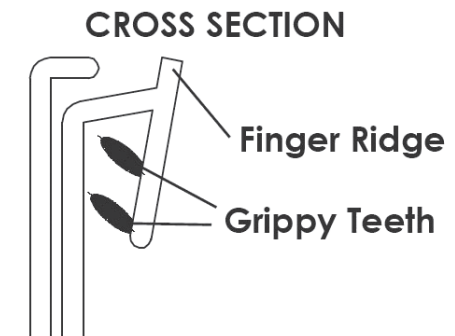

Other Important Facts about Bricor Data Strip

Bricor Data Strip is made from the highest quality PVC for improved clarity & has added Impact Modifiers & UV Stabilisers to help prevent cracking & yellowing.

The Bricor proprietary material formulation is designed to produce a consistently high quality Data Strip product that, in combination with the best German adhesives, produces the best long-term usage, quality Data Strip on the market today.
